

Announcement of Undergraduate Research Assistantships

The Department of Transportation Studies announces the availability of undergraduate student research assistantships. Faculty members in the department created this opportunity with an attempt to help undergraduate students increase their work experiences. In this opportunity, students will work with faculty members on a number of externally funded research projects. Students' responsibilities include data collection, search of literatures, survey form design, data analysis, scientific experiment, and other duties that will be assigned by the faculty advisors. The stipend will be paid at a rate of \$8.00 per hour. An estimate of 40-60 hours of work per month is expected for each student.

Students who are interested in this assistantship should go through a competitive selection process administered by the faculty committee. Criteria for the selection will include students' academic performance, writing skills, recommendation letters, as well as the match of students' background with the needs of the particular research project. Those who are interested should prepare and submit the following materials:

1. Application cover letter stating your interest
2. Transcript
3. Detailed Resume
4. Two recommendation letters from your instructors

Please submit your application package to:

Dr. Lei Yu, Ph.D., P.E.
